

SECRET.

HALDANE/1/5/3/31 f. 1

at Rothamsted Experimental Station,
Harpenden, Herts.

17th February, 1943.

Dear Pratt,

You asked me to obtain, through the Soviet Embassy, information regarding further work by Prikladovitzki, and in return to offer them a summary of the physiological results reached here. I have therefore drawn up the memorandum of which I enclose a copy. Will you be good enough to let me know whether I may submit it? If so I think it would only be right to send another copy to Capt. Poppen of the U.S. Naval Medical Service, for his information. Do you agree to this? As you know, the U.S. Navy has already had an account of our earlier work through Lt-Comdr. Armitage.

Yours sincerely,

(J.B.S. Haldane).

Enclosure.
