UNIVERSITY DEPARTMENT OF CLINICAL NEUROLOGY
THE NATIONAL HOSPITAL
QUEEN SQUARE
LONDON, W.C.1
(TERMINUS 3611)

9.1.65

Dear Professor Penrose,

Professor Gilliatt and
I were very pleased that you
were able to come to the paper
on muscle activity. We were
sorry that the discussion was
cut short; although the Chairman
said that he would have it
with a later paper my results
were not in fact discussed.

F. 1v

I look forward very much
to having your opinion of
the work and your advice
on examining the carriers.
The automatic counter which we
have almost completed, will
enable me to sample muscles
more extensively than has been
possible in the past and this may
give us a more nearly complete
picture of the activity in a ~~gas~~
particular muscle.

yours sincerely

R. G. Willison
