

You are about to see a series of signs that did not exist.

There is a period of 12 seconds when you will see a title slide and then a black out.

After this you will see a Deaf person signing these non-signs.

Each series of non-signs lasts around 2 seconds.

There is then a black screen for 3 seconds.

During the 3 seconds of black please try to repeat the non-signs you have seen to the video camera.

In total there are 64 clips of non-signs with the experiment lasting no more than 7 minutes.

Please push the spacebar when you are ready to start.
